PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Full-Stack Web Development, Artificial Intelligence, Cloud Computing, and IoT systems. Built and deployed multiple technical solutions using React, Node.js, MongoDB, AWS, Machine Learning, and Computer Vision technologies. Experienced in scalable web applications, REST APIs, deep learning models, and cloud-based systems.

EDUCATION

Indian Institute of Information Technology, Sri City	Chittoor, Andhra Pradesh
Bachelor of Technology in Computer Science and Engineering CGPA: 9.24/10	06/2023 – 05/2027
Sri Chaitanya College	Vijayawada, Andhra Pradesh
Intermediate (Class 12) Percentage: 98.4%	06/2021 – 06/2023
Montessori English Medium School	Guntur, Andhra Pradesh
High School (Class 10) CGPA: 10.0/10	06/2020 – 05/2021

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript (ES6)
Web: HTML5, CSS3, Node.js, Express.js, REST APIs
Frameworks: React.js, Redux Toolkit, Tailwind CSS, Bootstrap
AI/ML: Deep Learning, CNN, OpenCV, Computer Vision, Siamese Networks
Cloud/IoT: AWS, Arduino, Sensors, Microcontrollers
Databases: MongoDB, MySQL
Tools: Git, GitHub, Docker, Swagger, Linux, VS Code

PROJECTS

Nutri Connect Web Application MERN, Render, MVC	01/2025 – 04/2026
- Developed a MERN-based healthcare platform featuring a 30-minute slot booking system with 2-week advance scheduling support - Implemented backend architecture using MVC design principles and built responsive interfaces using React, Redux Toolkit, and Tailwind CSS - Integrated authentication, appointment scheduling, and REST APIs for seamless user interactions - Configured Docker containerization, Swagger API documentation, and CI/CD deployment workflows using Render - GitHub: github.com/sriramnerella/nutri-connect	
Image Copy Detection for E-Commerce CNN, Siamese Network, OpenCV	12/2025 – 04/2026
- Built an image plagiarism detection system using ConvNeXt Siamese architecture and Computer Vision techniques - Trained the model using CIFAR, UCID, Flickr, and custom datasets for duplicate image identification - Achieved over 85% accuracy in detecting counterfeit product listings and edited images - Applied feature extraction and similarity learning methods to improve detection robustness	
IoT-Based Smart Jacket with ML for Real-Time Analytics IoT, ML, Python	03/2025 – 04/2026
- Integrated 6 sensors into a wearable smart jacket for monitoring physiological and environmental parameters - Utilized Kaggle datasets and machine learning techniques for anomaly detection on real-time sensor streams - Achieved 95% prediction accuracy and enabled cloud/mobile-based alert systems - Enabled real-time analytics and automated monitoring through IoT infrastructure - GitHub: github.com/sriramnerella/IOT_Based_Smart_Jacket	

CERTIFICATIONS

- CodeWithHarry Data Science Course – Completed Python, Machine Learning, and AI fundamentals training
- OutSkill AI Workshop – Worked on hands-on projects involving LLMs, AI agents, and automation workflows
- Web3 and Blockchain Summer School – Web3SSH, IIIT Sri City (05/2025)

ACHIEVEMENTS

- Solved 300+ algorithmic and data structure problems on LeetCode
- Finalist among 300+ participants in Code Clash Arena Competitive Programming Contest

LANGUAGES

Telugu (Native) | English (Fluent) | Hindi (Proficient)
